

At Nantwich Cheese we offer a comprehensive contract packing solution to the food industry, whether you are a manufacturer that requires our specialist machinery or simply a trading arm that requires the support of a comprehensive manufacturing facility. We are able to process and package your cheese products to your exact requirements. We're happy to work with customers looking for one of services as well as customers looking for a long term trading relationship. We work with a wide range of businesses, providing our contract packing solution from independant and boutique companies to large multi-national organisations such as Ornuia (formally The Irish Dairy Board) and Dairygold Food Ingredients. Until recently we as a business relied heavily on a contract packing solution with an external provider to supply packing facilities for some of our core lines, therefore we fully understand the importance of building an excellent relationship with the businesses we carry out work for. We offer a contract packing solution for a variety of production methods including;

- Grating
- Cutting
- Extruding
- Blended Cheeses
- Cheese Waxing

Our production facilities are impressive and use the latest in technological innovation, but don't take our word for it, arrange a site visit and see for yourself. All of our facilities and operations are accredited to BRC grade A standard and as a business we are continually investing in our facilities to ensure that we always adopt the latest technology and practices.
